

The QD3300: Offering You a Full Size Visualizer at an Affordable Price

QD3300 is the most cost effective full size QOMO document camera on the market. Offering a 1.3 megapixel CMOS camera, it delivers crystal clear images and amazingly crisp text.

With the plug-n-play USB 2.0 high speed image capture and video recording system, no driver installation is needed. QD3300 can work with both Mac and PC platforms, interfacing with other software programs to build curriculum and seamlessly working with any interactive whiteboards on the market.

Full size platform provides a low profile versatile working surface for documents, 3D and moving objects.

The built-in-full size light box allows viewing of full size transparencies, X-rays, and photographic negatives without running out of room.

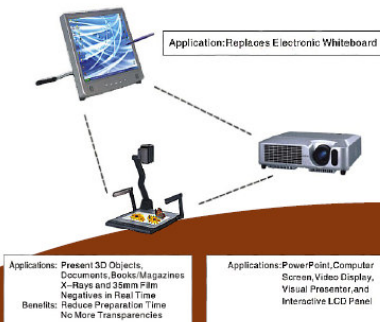

Multiple presentation features enrich the presentation experience: title, negative, freeze, rotation, and mirror.

Lastly, the switching and RS232 control functions let users switch inputs and control multiple devices with ease.

Specifications
